

Humanoid Virtual Athletics Challenge 2026

Build and run your humanoid robot in the virtual world!

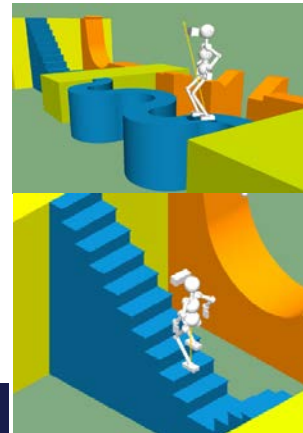

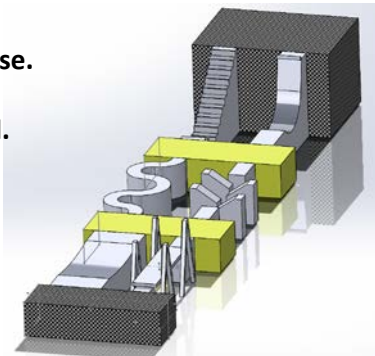

HVAC2026 Call for Participation

Humanoid Virtual Athletics Challenge is a simulation-based robotics challenge aiming at co-learning of motion planning and control techniques for humanoid and legged robots. HVAC2026 calls for participation of enthusiasts in three challenge categories athletics, dance, and sprint. Awards will be sent to teams for achieving milestones.

Category 1 Athletics

Make your robot reach the goal of the athletics course. The course consists of multiple routes that each participant can choose based on their technical level.

Milestone : Clear difficult course

Category 2 Dance

Make your robot dance. The quality of dance is evaluated based on technical and artistic scores. You may create your own dance motion and robot model or use provided materials.

Category 3 Sprint

Make your robot run 20m as fast as possible!

Milestone : Time 5 seconds or less

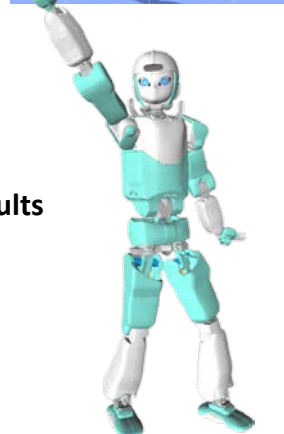

Schedule

After registration, you can submit simulation log data anytime prior to the main challenge event. Qualified results will be listed on the challenge web page.

Main challenge (workshop) September 2026

To be held as an open forum of annual conference of RSJ (hybrid meeting, Japanese language/timezone)

* HVAC2026 is hosted by the Special Interest Group on Humanoid Robotics of the Robotics Society of Japan (RSJ-SIG-HR).

List of HVAC2026 organizers

Yuichi Tazaki	(Kobe Univ.)
Takumi Kamioka	(Stealth Startup)
Tomomichi Sugihara	(OMRON Corp.)
Masaki Murooka	(AIST)
Kenji Hashimoto	(Waseda Univ.)
Ikuo Mizuuchi	(TUAT)
Yohei Kakiuchi	(TUT)
Shin'ichiro Nakaoka	(Choreonoid)
Soh Yukizaki	(KHI)
Kunio Kojima	(Univ. of Tokyo)
Taiki Ishigaki	(Tokyo Univ. of Science)
